

WOWBODY SLIM

International Beauty Franchise Concept

YOUR SUCCESSEFUL FRANCHISE BUSINESS

Is an international beauty franchise concept was built by professionals with **more than 15 years of experience** in polish beauty market. It was built with the objective of

Spreading polish beauty all over the world.

It is a women-only space designed to shape the body in a spectacular way.

How long does it take for your investment to ROI ?

All initial costs should be earned back in about 30-40 months.

Make roughly 8.000 to 10.000 euro per month.

WHAT IS OUR BUSINESS?

We are part of a great concept.
Wowbody.Slim is an extended version
of Wowbody Depilation.

OUR PHILOSOPHY

Every woman is a beautiful and unique!

OUR MISSION

That is why our mission is to support women in the belief that each of us is unique and our body deserves care and attention.

In our salons, we place great emphasis on the quality of the treatments performed, the professionalism of the staff and the individual approach to the client. Our team consists of high-class specialists who provide professional advice at every stage.

*Our body
is our home for life.*

WE OFFER OUR CLIENTS

INDIVIDUAL APPROACH

All our treatments are tailored to the individual needs of the client.

SERVICE QUALITY

Our experienced and qualified employees perform all treatments in accordance with the highest standards.

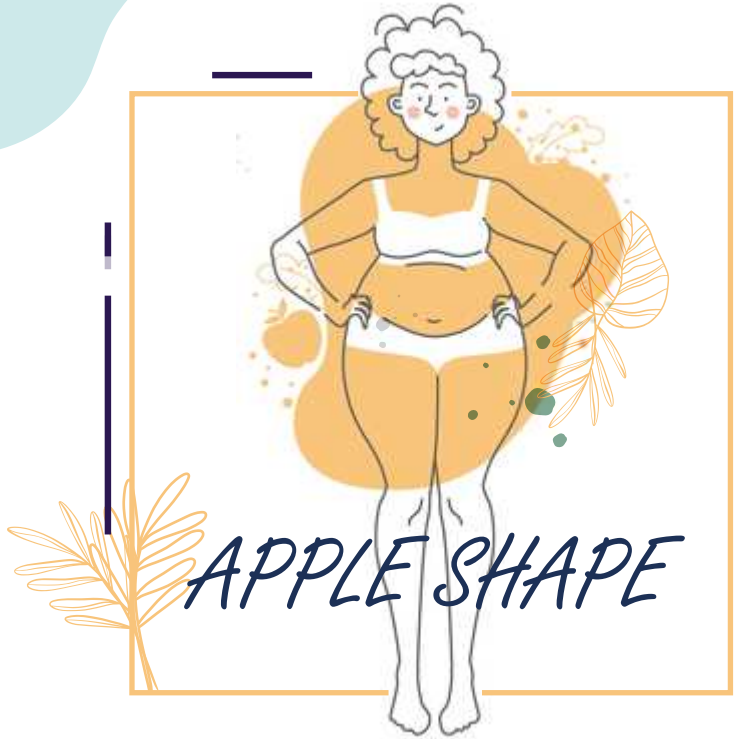

With WOWBODY.SLIM, You will achieve your Dream Body Shap

Unique concept

Based on the unique know-how, 15 years ago, an exemplary model of WowBody.Slim has become a brand and a symbol of an established way to do business.

Industry leader in Poland

WowBody.Slim have been among top brands of beauty businesses in Poland. WowBody.Slim is highly chosen franchise in the industry in Poland.

Clear and transparent rules

no charge for the profits achieved by running a WowBody.Slim.
What you earn is yours!

Innovative devices

Year after year, we create new, innovative devices, always using the best technologies available on the market.

An original line of supplements and cosmetics

WowBody.Slim manufactures 100% natural products that belong exclusively to the Premium Brand segment.

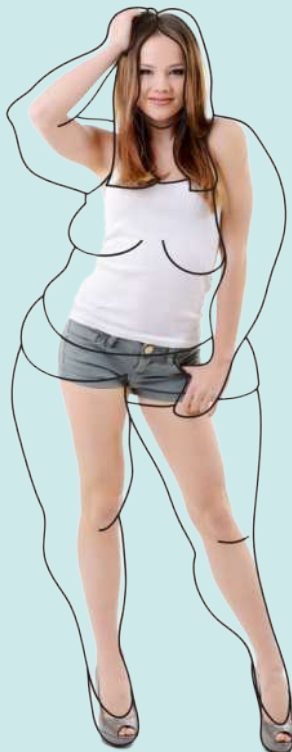

Substantive support

Each partner, from the first days of the agreement, is assigned a mentor who regularly checks in with them and is always ready to help if a problem occurs.

Experience exchange

We do not compete with each other but cooperate instead.
We are all one big WowBody.Slim family!

WHAT MAKES THIS BUSINESS STAND OUT?

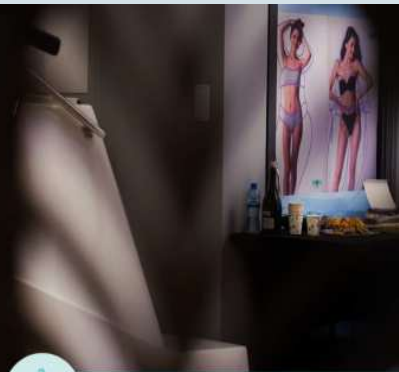

In addition:
**Highly professional
& experienced Staff**

ZONES:

FITNESS ZONE

It all started with Roll Shaper.

In our fitness zone, WowBody.Slim created a line of devices with additional health positive effects like infrared light, collagen lamps etc. The technology used in them allows for burning fat selectively, four times faster than during standard exercises in the gym. Another example of innovative solutions is the introduction of technology that makes it possible to generate specific vacuum pressure, stimulate effort and accelerate the achievement of the intended results.

ORBITREK Z LAMPAMI

wowbody.eu

Info@wowbody.eu

www.wowbody.eu

ZONES:

WELLNESS ZONE

After engaging fitness exercises, we offer relaxing treatments from the wellness zone.

Apart from body shaping and cellulite reduction, they have a health-improving effect. The lymphatic drainage technology allows, for example, to reduce lymphoedema and can be used as an anti-varicose therapy. Every device in the wellness zone is in-house manufactured by WB.slim.

ZONES:

AESTHETIC COSMETOLOGY

In addition to developing a dream body, clients have the opportunity to use the full range of body beauty treatments.

Such as improving the contour of the face, tightening loose skin after pregnancy or weight loss, reducing wrinkles or rejuvenating (by increasing the production of collagen - called the protein of youth).

Aesthetic cosmetology treatments also activate cell regeneration, support the natural metabolism and immune system.

ZONES:

COSMETICS & SUPPLEMENTS

WowBody.Slimhas created a premium line of cosmetics and dietary supplements that perfectly complement our body shaping concept.

They are all made in Poland.

Each of supplements and cosmetics consists of only natural ingredients. The high amount of active elements and lack of petroleum-based substances in cosmetics are only some of the characteristics that distinguish the line. Except for the collagen, that can not be acquired differently, every WowBody.Slimproduct is also vegan.

CATALOGUE OF DEVICES & COSMETIC STATIONS

FITNESS ZONE | WELLNESS ZONE | AESTHETIC COSMETOLOGY

FITNESS ZONE

ROLL SHAPER

Clinical tests carried out on the device confirmed the impact of the training program on the three parameters of:

Weight loss

Stabilization of
blood pressure

increased flexibility
confirmed by Laseque's test

This device is designed to mechanically massage the body by acting directly on the skin's surface. Lymph flow is stimulated by pressure and the smooth movement of wooden balusters with flaps.

The device's operation is based on a workout program that contains 18 training positions to massage every part of the body.

Shaper is a very effective method of cellulite removal, shallowing stretch marks, reducing weight, slimming, and shaping the body. Additionally, it reduces muscle and neurological stress, has a positive effect on sleep, and creates a general relaxation of the body thanks to the release of endorphins, hormones that promote happiness.

ROLL SHAPER

IR (INFRARED) RADIATION

The Roll Shaper is additionally equipped with IR radiation. Heating the skin tissue to a depth of 2 cm supports the process of weight loss and slimming.

WEIGHT AND DIMENSIONS

Weight: 97kg (213,9 lb)

Dimensions: 116cm (45,7 in) x 84 cm (33,1 in) x 94 cm (37 in) with hand

ELECTRICAL PARAMETERS

Rated supply voltage: 230 ~/50Hz

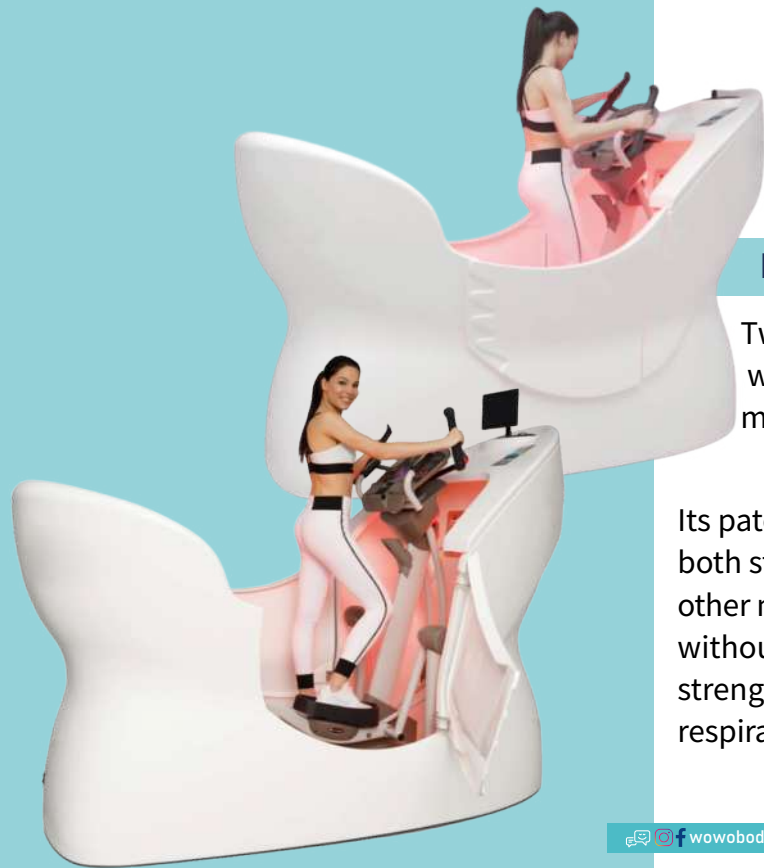

Maximum power: approx 650W

INFRA SHAPER

Innovative synergy of four components:
Infrared lamps (for collagen fiber rebuilding), collagen light therapy (for regeneration of the outer skin layer), ionization system (great influence of negative ions), twister recumbent bike (to activate all muscle groups). This combination wonderfully supports body shaping.

I TWISTER RECUMBENT BIKE

Twister recumbent bike is an innovative device which combines cardio workout with abdominal muscle exercises.

Its patented rotation system allows to exercise both straight and oblique abdominal muscles and other muscles, including the torso, shoulder, and arms, without strain on the spine. Cardio training sessions strengthen the heart, improve the work of the respiratory and coronary systems, and reduce cellulite.

II COLLAGEN LIGHT – COLLARIUM

Collagen light therapy is a process of skin irradiation with mild red-light waves of length 550-700 nm.

This rebuilds and strengthens collagen and stimulates cells to produce more of it.

III IONIZATION SYSTEM

Nowadays, we really need negative ions. Computers and smartphones emit positive ions which are damaging to our health. The air is rich of negative ions mostly at the seaside, in coniferous forests and near waterfalls. The ionizer emits ions most similar to those produced by nature – it changes one electric charge of particles floating in the air (dust, pollen, mites, bacteria, mold, mushrooms, spores), and causes the subsidence of contaminants on the surface which removes them from the air.

IV INFRARED RADIATION

The process of infrared radiation - electromagnetic - is, in very simple words, about thermal effect. The three types of IR waves used are: IR-A, IR-B, and IR-C. In IR radiators used in cosmetology, including our Swan, IR-A radiation is mainly used. This is because the shortest infrared waves can penetrate deepest and heat-up the most intensively. The general rule concerning wavelengths is their inverse proportionality regarding the ability of tissue penetration - the shorter the wave, the less ability to penetrate deeply into the skin.

The IR wavelength is between 780 and 1400 nm. The effects of IR waves reduce skeletal muscle tension and has an analgesic effect which increases the threshold of pain sensation, increases metabolism, and stimulates the skin's thermal receptors. It expands the skin's blood vessels, increases thermogenesis and stimulates deeper vessels.

VACU SHAPER

Selective fat burning – the slimming of lower parts of the body without a bust reduction.

This workout is based on walking on a treadmill in a closed vacuum capsule. It insensifies the flow of blood and oxygen to the lower limbs, buttocks and abdomen. Fatty acids are released from fat cells much faster compared to a classic walk or run on a treadmill. In the same duration of workout time, you can burn your fat tissue four times faster than on a classic treadmill. Lymph circulation is accelerated in a vacuum environment, so toxins are removed from the body faster

RESULTS

- reduction of cellulite
- a modeled body
- weight loss
- reduction of body circumference
- selective fat loss – without reduction of the bust
- visible effects after just 8 workouts
- intensive fat burning
- 3 x faster fat burning compared to classic cycling/ 4 x compared to a classic treadmill

WEIGHT AND DIMENSIONS

Weight: 185 kg (72,8 in)

Dimensions: 255 cm (100,4 in) x 100 cm (39,4 in) x 195 cm (76,8 in)

ELECTRICAL PARAMETERS

Rated supply voltage: 230 ~/50Hz

Maximum power: approx. 2200W .

BIEŻNIA VACU

BODY SPEED

The bike is used for cardio, interval and endurance workouts. This is a great option for clients who cannot train on enclosed training stations (where the maximum load is 90kg).

Characteristic of this device is a convenient seat with a backrest that includes handles on the sides.

The position one is taking is much more comfortable than on a classic bike. Additionally, training on Body Speed relieves the lumbar spine and knee joints.

Body Speed training is for everyone. It is perfect for the elderly and for people with reduced mobility or contusions and injuries.

RESULTS

- increases blood oxygenation
- improves skin firmness
- reduces cellulite and makes it slimmer
- shapes the body
- causes weight loss
- builds and strengthens muscles
- reduces and slims cellulite

WELLNESS ZONE

LYMPH DRAINAGE

This treatment provides intensive and effective lymphatic drainage of the feet, legs, lower abdomen, buttocks and, in the version with upper' cuffs', also arms. It is a specialized device designed to carry out a deep press therapy a pressure massage technique which stimulates the production of new lymphatic fluids. It also develops the lymphatic system and makes it permeable. It is a great solution for the treatment of swollen and sore lower limbs.

It is one of the most effective methods of calf and thigh modeling. It also accelerates the slimming and reduction of cellulite.

The patient wears a special suit that is tightly closed. Air is then pumped in from the chamber in the direction of lymph circulation and with varied intervals depending on the treatment program. This way, local pressure is applied in an alternating manner and pressure is released which results in drainage of the body.

RESULTS

- weight loss
- removal of accumulated water in the limbs
- swelling reduction
- stimulation of circulation
- no more cold feet issues
- reduction of cellulite
- firms and smoothens the skin
- detoxification
- relaxation

WEIGHT AND DIMENSIONS

Weight: 21 kg (46,3 lb)

Dimensions: 43 cm (16,9 in) x 22,5 cm
(8,9 in) x 21 cm (8,3 in)

ELECTRICAL PARAMETERS

Rated supply voltage: 230 ~/50Hz

Maximum power: approx. 75

SAUNA INFRARED

The operation of the Infrared Sauna is related to infrared radiation infrared and the thermal energy that is produced which warms the body and produces the desired effects without needing to reach very high temperatures. Our Infrared Sauna heats the body, not the air.

Infrared Sauna works thanks to infrared rays and the thermal energy emitted by them. Infrared waves of different wavelengths penetrate up to 3 cm deep into the subcutaneous tissue, raising its thermogenesis.

The IR sauna pleasantly warms the body to a temperature of 30-70~C.

- supports weight loss and cellulite reduction
- firms and smoothens the skin
- warms and relaxes the muscles
- support for the treatment of skin diseases
- detoxification
- reduction of muscle and joint pain

ELECTROSTIMULATION + IR

The device is enriched with IR technology. Infrared light supports the process of modeling and slimming the figure and, thank to the emitted warm, the treatment is more pleasant. In addition, electrostimulation affects body contouring and sculpting the muscles - half an hour of stimulation is adequate several hours of effort.

RESULTS

- strengthening and tension of all the layers of muscles
- stimulation of fat breakdown, increased metabolism
- stimulation of subcutaneous connective tissue – firming the skin and its better condition
- stimulation of collagen production, better flexibility of microfiber
- better blood circulation
- stimulation of lymphatic system
- detoxification
- improvement of nutritional processes and metabolism
- relief of tension and pain

WEIGHT AND DIMENSIONS

Weight: 11kg (33 lb)

Dimensions: 37 cm (14,6 in) x 57cm
(22,4 in) x 93 cm (36,6 in)

Rated supply voltage: 230 ~/50Hz

Maximum power: approx. 65 W

AESTHETIC COSMETOLOGY

BEAUTY SHAPER ADVANCED

An endermologie enriched with radiofrequency (RF) waves, infrared laser and ultrasonic liposuction.

Beauty Shaper is equipped with the following heads:

Large one for the endermologie (vacu, IR, RF and moving rolls),

Small one for endermologie (vacu, RF, IR), Smaller one for

a face (vacu, RF, IR), the smallest one for a face and eyes

area (vacu, RF) + a head for ultrasonic liposuction.

ENDERMOLOGIE

The treatment uses the head to make a vacuum under pressure massage which improves the blood supply of fat tissue. Additionally, it uses a biostimulation IR laser which works the shallow layers of the skin, increases the temperature in fat tissues and boosts metabolism. Moving rolls (emitting RF waves) makes the lymphatic system permeable and improves detoxification. Radiofrequency waves work in the deep layers of the skin, increase the temperature in fat tissues and boost metabolism.

ULTRASONIC LIPOSUCTION

During the treatment, the epithelium of the fat cells is destroyed external ultrasounds which exert a micro massage effect on a fat tissue. Broken fat cells, fatty acid and glycerol, are transported to the liver through the vascular and lymphatic systems. Then they are treated in the same way as fat cells in food.

ULTRASONIC LIPOSUCTION + vacu

The additional use of negative pressure in this head contributes to the improvement of tissue blood supply by providing an increased dose of oxygen necessary for fat burning and cellulite reduction.

RESULTS

- firming the skin
- reduction of fat tissue and cellulite
- modeling the body
- detoxification
- lifting of the skin of the eyes and neck areas
- visible effects after just 1 treatment
- support for scar treatment
- smoothing of wrinkles

CAVI SHAPE ADVANCED

This treatment can be for both the face and body

The device has many functions that complement each other. Basic functions include: a small multipolar RF head for the eyes area (1), a larger multipolar head for the face, neck, and a cleavage (2), a large multipolar RF head for the body (3), heads of Jade Energy (4), ultrasonic liposuction (5) and Vacu head + bipolar RF (6). This treatment can be for both the face and body.

EYE RF | FACE RF (1 + 2)

Thanks to RF waves, the skin is firmer and wrinkles are reduced.

During the treatment, collagen is shrinking as far as its tense is strong enough to rebuild its structure. Increasing the temperature stimulates fibroblasts to undergo synthesis of collagen and elastin to increase skin elasticity.

The dermis and subcutaneous tissue are warmed up to widen blood vessels.

As a result, it improves the nutrition, oxidation, and metabolism of the skin.

BODY RF (3)

The multipolar head for the body emits RF waves, energy that reduces fat tissue.

Radiofrequency wave equipment is based on selective thermo-induction, ie. radio waves break down fat cells without damaging surrounding blood vessels and nerve cells.

The warmth, produced by radiofrequency waves, induces in a fat tissue. It leads to the decay of triglycerides, contained in adipocytes, into free fatty acids and glycerol.

Additionally, blood circulation and metabolism increases to reduce fat tissue. Moreover, radiofrequency waves support penetration of active compounds in the skin.

JADE ENERGY (4)

Infrared radiation modified by natural minerals (split by quartz) has a soothing effect on damaged skin, warms subcutaneous tissue up and stimulates muscle tendons so signs of aging, such as loose and sagging skin, are reduced.

It has an influence on collagen reconstruction and fiber elasticity, and gives a local analgesic effect.

ULTRASONIC LIPOSUCTION (5)

Ultrasonic liposuction (or cavitation liposuction) – is a painless treatment for fat tissue reduction by circumference reduction of chosen body parts. Ultrasonic cavitation effects are visible just after the first session: noticeable fat tissue reduction of chosen body parts is observed, and the elasticity and firmness of the skin is improved. Thanks to properly adjusted power and frequency of ultrasounds, there is a cavitation effect – fat cells are broken down and triglycerides are gradually received by the lymphatic system, and are transported to the liver, where they are metabolized.

Metabolism improvement helps reduce cellulite.

The treatment is painless – only the low noise of the device head's work is audible.

The skin surface stays smooth and intact.

Cavitation liposuction is completely non-invasive. It does not cause unwanted side effects, and does not require convalescence or for the client to stay at home.

VACUM + BIPOLARRF (UNDER PRESSUREHEAD WITH FUNCTION) (6)

Two combined technologies – Vacuum and RF – cause mechanical granulation of fat tissue up to 3 cm in depth. Then fat cells are breaking down due to their rapid warming and then are gradually removed.

We can observe reduction of the fat tissue excess in a chosen body area and firm skin.

RESULTS

- body shaping
- relieving the porosity of the skin by removing fat from different levels
- reducing skin tension and relieving pain
- reduction of stress and tiredness
- lifting and better elasticity and shape of the face skin
- activation of cells regeneration, supporting natural metabolism
- reduction of fat tissue
- body shaping
- visible reduction of body parts' circumstances just after one treatment session

WEIGHT AND DIMENSIONS

Weight: 25 kg (55,1 lb)

Dimensions: l. 40 cm (15,7 in) x w. 50 cm (19,7 in) ht. 120 cm (47,2 in)

ELECTRICAL PARAMETERS

Rated supply voltage: 230 ~/50Hz

Maximum power: approx. 90W

LIPOLASER

Effortless loss of centimeters.

This device is completely safe and reduces fat cell volume without any pain.

We can observe a reduction of circumferences by using a cold diode laser which stimulates changes of fat cell membrane diameters and their permeability.

RESULTS

- reduction of excess fat tissue
- reduction of cellulite
- visible smoothing of skin
- improvement of metabolic process
- results noticeable after first treatment
- body shaping
- relieving the porosity of the skin by removing fat from different levels
- reducing skin tension and relieving pain
- reduction of stress and tiredness
- lifting and better elasticity and shape of the face skin
- activation of cells regeneration, supporting natural metabolism
- reduction of fat tissue
- body shaping
- visible reduction of body parts' circumstances just after one treatment session

WEIGHT AND DIMENSIONS

Weight: 25 kg (55,1 lb)

Dimensions: l. 40 cm (15,7 in) x w. 50 cm (19,7 in) ht.
120 cm (47,2 in)

ELECTRICAL PARAMETERS

Rated supply voltage: 230 ~/50Hz

Maximum power: approx. 90W

LASERS FOR DEPILATION

The most powerful of our lasers gives great results after just three procedures. Due to a separate cooling handle, it protects the skin from overheating.

Innovative device for laser hair removal generating three beam lengths with one light impulse.

The wavelength of 755/808/1064 being used together guarantees the highest efficiency of hair removal.

755 nm alexandrite laser especially effective for surface embedded hair.

808 nm diode laser designed for high hair density.

- 1** Laser 1064 nm neodymium-yag laser's primary focus is the skin papilla, formed from tiny capillaries that surround the hair follicle.
- 2** The laser beam reaches the skin papilla and destroys the vessels that nourish the hair follicle. In addition, the 1064nm laser allows for a removal of deeply embedded hair.
- 3** The modern cooling system used in the laser head eliminates pain sensations, which increases the comfort of the treatment.
- 4** The combination of three beams is ideal for hair removal on all skin types, regardless of hair color.
- 5** This technology reduces the number of treatments required (4-6) for satisfactory effects.
- 6** The diode laser provides you with smooth skin without irritations.

WEIGHT AND DIMENSIONS

Weight: 85 kg (187,4 lb)

Dimensions: 51,5 cm (20,3 in) x w. 56 cm
(22 in) ht. 121 cm (47,6 in)

ELECTRICAL PARAMETERS

Rated supply voltage: 230 ~/50Hz

Maximum power: approx. 680W

BODY SCALE

The Body Scale is a body composition analyzer, which uses the BIA (bioelectrical impedance analysis) method. It is based on differences in the electrical impulse flow of particular tissues of the body.

The results obtained are highly repeatable.

The analyzer uses a current with a frequency and intensity close to the natural biocurrent parameters of the body, making the measurement noninvasive and safe.

With help of Body Scale we receive parameters such as:

- BMR- resting metabolism is an indicator that shows how much energy the body uses to support all life functions.
- BMC- mineral bone mass, in other words – their calcification.
- Bio Age - metabolic age is a parameter that shows how old our body feels.
- TBF% - body fat percentage.
- TBW% - body water percentage.
- SM% - skeletal muscle rate index - skeletal muscle mass expressed as a percentage of total body weight.
- VFI% - visceral fat index - it is adipose tissue that surrounds internal organs, body fat index.
- BMI - body mass index, indicating the ratio between height and weight.

OUR TARGET GROUP

The services are addressed to women struggling with obesity, including diagnosed obesity as a disease, with impaired lymph flow, problems with hypertension and for people who want to take care of their body appearance, improve the figure and overall condition.

Such facilities are also very popular among people leading a sedentary lifestyle. Spending many hours a day sitting in an office or at home increases the risk of high blood pressure, coronary heart disease, heart attack, stroke and many other diseases.

For post-pregnancy women who want to take care of their body and appearance after childbirth. Usually such women have a problem with overweight and loss of skin elasticity.
